**ISO 9001:2000 Certification Earned By INRange Systems, Inc.**

(Pittsburgh PA) SRI Quality System Registrar is pleased to announce that it has recently awarded an ISO 9001:2000 Management System certificate to INRange Systems, Inc., located in Altoona, Pennsylvania, for design, development and supply of an electronic medical management assistant and monitoring services.

According to A. Joseph Falcsik, SRI's Vice President, Certification: "We are pleased to acknowledge that INRange Systems, Inc. has demonstrated effective implementation of a management system. ISO 9000 certification provides evidence to customers, suppliers, employees, and their community of their commitment to producing a quality product (service) and providing customer satisfaction."

ISO 9001:2000 is process-based; certification recognizes organizations that can link business objectives with operating effectiveness. Companies that achieve management system certification to ISO 9001:2000 have demonstrated effective implementation of documentation and records management, top management's commitment to their customers, establishment of clear policy, good planning and implementation, good resource management, efficient process control, measurement and analysis. Continual improvement has been institutionalized.

INRange Systems, Inc. based in Altoona, Pa., commercialized its remote medication management technology, called EMMA, last August. The technology can be wirelessly controlled by a pharmacist and enable patients to manage medications in a home setting. Because the technology has been cleared by the Food and Drug Administration, a patient is not required to have a medical professional present for medication disbursement.

*SRI Quality System Registrar is an internationally accredited registrar for management systems standards, such as ISO 9001, AS9100, ISO/TS 16949, ISO 13485, and environmental management systems standards such as ISO 14001. SRI also provides public training for auditing, implementing, and maintaining these standards.*
